Introduction to Metaphysics is a revised and edited 1935 lecture course by Martin Heidegger first published in 1953. Heidegger suggested the work relates to the unwritten "second half" of his 1927 magnum opus Being and Time. The work is also notable for a discussion of the Presocratics and for illustrating Heidegger's supposed "Kehre," or turn in thought beginning in the 1930s—as well as for its mention of the "inner greatness" of Nazism.
