The new eighth edition of Financial Accounting: Tools for Decision-Making, Canadian Edition by Kimmel, Weygandt, Kieso, Trenholm, Irvine and Burnley continues to provide the best tools for both instructors and students to succeed in their introductory financial accounting class. It helps students understand the purpose and use of financial accounting, whether they plan to become accountants or whether they simply need it for their personal life or career. The book's unique, balanced procedural and conceptual (user-oriented) approach, proven pedagogy and breadth of problem material has made Financial Accounting the most popular introductory text in Canada. This hands-on text, paired with a powerful online teaching and learning environment offers students a practical set of tools for use in making business decisions based on financial information.

This text provides a contemporary introduction to accounting and accounting systems. It covers the essence of both financial and managerial accounting in a non-procedural, non-debit and credit manner. After a brief introduction to financial statement preparation, the remainder of the text focuses on controls and the use of accounting information in decision making.

An intermediate accounting text which frames the financial reporting function of accounting in the context of the decision-support role it serves. It includes real world examples and diverse types of cases such as financial reporting, research and Internet cases from a global perspective.

Weygandt's Financial Accounting, 8th Edition, builds upon previous issues by offering a more in-depth introduction to financial accounting with a continued focus on relevant examples based on everyday life.
