Create Better Compositions by Design
The path to better painting begins with Mastering Composition. This effective guide blends clear, visual instruction with 5 step-by-step demonstrations to show you how to plan and paint your best work yet.

Access Free Art Fundamentals Color Light

Composition is the key, and here you'll learn to design paintings with new skill and confidence. It all begins with the armature or structure of the picture plane. Every great painting has one, and you'll see through several famous examples exactly how the Old Masters used armatures to create movement, narrative, harmony and fluidity. Based on these examples, you'll practice what you've learned following a series of hands-on demonstrations. Once you understand the basic principles of design, you'll be amazed at how quickly and effectively your compositions come together. Soon you will be painting more boldly and confidently than ever before with less reworking and overworking. Whether you're a beginner looking for basic instruction or a more advanced painter

troubleshooting a specific problem, the proven methods in this book will work for you. Ideal for all mediums, Mastering Composition gives you the knowledge you need to create powerful paintings out of every subject.

From New York Times best-selling author of the Dinotopia series, James Gurney, comes a carefully crafted and researched study on color and light in paintings. This art instruction book will accompany the acclaimed Imaginative Realism: How to Paint What Doesn't Exist. James Gurney, New York Times best-selling author and artist of the Dinotopia series, follows Imaginative Realism with his second art-instruction book,

Access Free Art Fundamentals Color Light

Color and Light: A Guide for the Realist Painter. A researched study on two of art's most fundamental themes, Color and Light bridges the gap between abstract theory and practical knowledge. Beginning with a survey of underappreciated masters who perfected the use of color and light, the book examines how light reveals form, the properties of color and pigments, and the wide variety of atmospheric effects. Gurney cuts through the confusing and contradictory dogma about color, testing it in the light of science and observation. A glossary, pigment index, and bibliography complete what will ultimately become an indispensable tool for any artist. This book is the second in a series based on his blog, gurneyjourney.com. His first in the series, *Imaginative Realism*,

was widely acclaimed in the fantastical art world, and was ranked the #1 Bestseller on the Amazon list for art instruction. "James Gurney's new book, *Color and Light*, cleverly bridges the gap between artistic observation and scientific explanation. Not only does he eloquently describe all the effects of color and light an artist might encounter, but he thrills us with his striking paintings in the process." --Armand Cabrera, Artist

This volume of practical instruction in the foundations of art features many splendid color illustrations by the author. Perfect for intermediate-level and advanced artists wishing to take their work to the next level.

Access Free Art Fundamentals Color Light

Discusses the basic elements of composition, including dot, line, texture, pattern, and space, and the principles for composing elements on a flat surface and in three dimensions.

Featuring hundreds of carefully hand-crafted illustrations as well as significant tuition on how to best compose and use images to create the most powerful frames, this book is potentially Hans P. Bacher's life's work encapsulated in one volume. Here, the internationally renowned production designer shares his expertise in an easy-to-follow and imaginative way – giving tips, exercises, and a depth of knowledge garnered from a lifetime in the industry. Bacher's production designs have established the look of many seminal animated films such as The

Access Free Art Fundamentals Color Light

Lion King, Balto, Mulan and Beauty and the Beast, so fans of his work will be delighted. While keeping the focus on storytelling, Bacher instructs readers in the art of animated cinematography with the ever-present aim of soliciting an emotional response from the audience. Vision: Color and Composition for Film represents an amazing depth of experience — and is visually arresting to boot.
