Beauty is Tepper’s cri de coeur to what she sees as the decline of beauty in the world. For the most part written in the first person it is set out primarily as a diary recounting the adventures of one Beauty, daughter of the Duke of Westfaire, as she travels in time and space and lives through several very familiar fairy tales.

It’s hard to find at times under the sprawl of plotlines, but if Beauty could be said to be about one thing, it is the decline and fading of the concept of beauty. Beauty herself is, through her "curse," a guardian of sorts of the concept of beauty, which Tepper approaches from a pastoral, romantic perspective and links to the beauty of the environment, simple love, imaginative stories, and a Heaven-like abstract rightness.

101 quotes from Sheri S. Tepper: [T]he scripture worshippers put the writings ahead of God. Instead of interpreting God’s actions in nature, for example, they interpret nature in the light of the Scripture. Nature says the rock is billions of years old, but the book says different, so even though men wrote the book, and God made the rock and God gave us minds that have found ways to tell how ...

Beauty by Sheri S. Tepper

With the critically acclaimed novels The Gate To Women’s Country, Raising The Stones, and the Hugo-nominated Grass, Sheri Tepper has established herself as one of the major science fiction writers of out Time. In Beauty, she broadens her territory even further, with a novel that evokes all the richness of fairy tale and fable. Drawing on the wellspring of tales such as "Sleeping Beauty," Beauty is a moving novel of love and loss, hope and despair, magic and nature. Set against a backdrop both enchanted and frightening, the story begins with a wicked aunt's curse that will afflict a young woman named Beauty on her sixteenth birthday. Though Beauty is able to sidestep tragedy, she soon finds herself embarked on an adventure of vast consequences. For it becomes clear that the enchanted places of this fantastic world--a place not unlike our own--are in danger and must be saved before it is too late.

"Lively, thought-provoking . . . the plot is ingenious, packing a wallop of a surprise . . . Tepper knows how to write a well-made, on-moving story with strong characters. . . . She takes the mental risks that are the lifeblood of science fiction and all imaginative narrative."—Ursula K. LeGuin, Los Angeles Times Since the flames died three hundred years ago, human civilization has evolved into a dual society: Women’s Country, where walled towns enclose what’s left of past civilization, nurtured by women and a few nonviolent men; and the adjacent garrisons where warrior men live—the lost brothers, sons, and lovers of those in Women’s Country. Two competing dreams. Two ways of life, kept apart by walls stronger than stone. And yet there is a gate between them. . . . "Tepper not only keeps us reading . . . she provokes a new look at the old issues."—The Washington Post "Tepper’s cast of both ordinary and extraordinary people play out a powerful drama whose significance goes beyond sex to deal with the toughest problem of all, the challenge of surmounting humanity’s most dangerous flaws so we can survive—despite ourselves."—Locus

"One of the most satisfying science fiction novels I have read in years."—The New York Times Book Review Here is a novel as original as the breathtaking, unspoiled world for which it is named, a place where all appears to be in idyllic balance. Generations ago, humans fled to the cosmic anomaly known as Grass. Over time, they evolved a new and intricate society. But before humanity arrived, another species had already claimed Grass for its own. It, too, had developed a culture. . . . Now, a deadly plague is spreading across the stars. No world save Grass has been left untouched. Marjorie Westriding Yrarier has been sent from Earth to discover the secret of the planet’s immunity. Amid the alien social structure and strange life-forms of Grass, Lady Westriding unravels the planet’s mysteries to find a truth so shattering it could mean the end of life itself.

Atop a twisting, canyon-climbing road, a witch lurks in a fortress built strong to keep out dragons and ogres. In another part of the countryside, a young orphan is maturing into a beautiful woman in the enchanted village that is her home. Somewhere nearby, a young man is seeking adventure after running away from his family’s small farm. Suddenly a strange and terrible prophecy sets off a chain of events that will bring these three together in the heroic, romantic, and thrilling tale of an age-old battle.

"Tepper takes the traditional icons of fantasy, restores their resonance, and makes them her own."—Minneapolis Star Tribune A century ago, a mysterious force wiped out human life on all surrounding worlds, leaving the planet Dinadh untouched. Now the unknown force is back—and this time humanity’s only hope lies with a woman who’d give anything not to get involved. Lutha Tallstaff’s mission is to locate the famed adventurer Leelson Famber, who has disappeared, taking with him what may be the only clue to the nature of the deadly threat. But Lutha cannot know that finding Famber will be the easy part of her journey. Through terrain alive with savage winged wraiths and fountains of fire, she will fight her way to the holiest place on the planet. And only then will she discover the shocking truth about the coldly inhuman force that threatens the future of mankind.

The bizarre events that have been ocuring across the United States -- unexplained "oddities" tracked by Air Defense, mysterious disappearances, shocking deaths -- seem to have no bearing on Benita Alvarez-Shipton’s life. That is, until the soft-spoken thirty-six-year-old bookstore manager is approached by a pair of aliens asking her to transmit their message of peace to the powers in Washington. An abused Albuquerque wife with low self-esteem, Benita has been chosen to act as the sole liaison between the human race and the Pistach, who have offered their human hosts a spectacular opportunity for knowledge and enrichment. But ultimately Benita will be called upon to do much more than deliver messages -- and may, in fact, be responsible for saving the Earth. Because the Pistach are not the only space-faring species currently making their presence known on her unsuspecting planet. And the others are not so benevolent.

A moving, compulsive science fiction novel from one of the best writers in the field When the human settlers arrived on Hobbs Land, the native intelligent species, the Owlbit, were already almost extinct. Before the last one died, a few years later, the humans had learned a little of their language, their ideas and their religion. It seemed the natural thing for the settlers to maintain the last Owlbit temple, with the strange statue that was its God. When that God died - disintegrating overnight - it seemed equally natural to start preparing its replacement. Maire Manone came to Hobbs Land to escape the harsh patriarchal religion of Voorstod, but Voorstod hasn't forgotten her - or forgiven her. But the men who arrive on Hobbs Land to find and return Maire to her homeland haven't taken Hobbs Land's God into account ...

A dreadful, awesome killing power is resurrected from the past . . . Powers are invoked and curses are being laid . . . Great waters are rising and changing the world . . . Long ago was the "Big Kill," horrible, apocalyptic events that destroyed nearly every living thing on earth. Since then the last of humankind has scattered into widespread small kingdoms separated by superstition, war, and fear. And now, while facing a natural catastrophe that threatens to drown a world, an ancient evil resurfaces and may prevent any chance of survival. With the future of humankind at stake, a small band of disparate characters—a lonely child, a loyal servant, a mysterious wanderer, and a most unusual horse—sets out on a journey fraught with peril and wonder . . . a sacred mission that leaves no room for failure. . . . Deeply original in scope and vision, The Waters Rising is a daring and remarkable work of speculative fiction—a tour de force from one of the most revered writers of our time.

On the planet of Elsewhere, the Council had always enforced the governing of each province in the manner the people had chosen, so long as each respected its neighbors' local customs--and so long as the people remained within their homelands. Generations later, inhabitants have begun to question this tradition. The Council has received mysterious messages and reports of strange manifestations across the planet. Now, Enforcer Fringe Owldark has been sent with a small crew of seven, each possessing an unusual talent, to investigate their worst fear--the arrival of the Hobbs Land gods. Free will and the reality of God are just too of the timeless issues this courageous band of humans must confront as they strive to decide if complete tolerance and leaving others alone is evil. . . and what they should do if it is. Vividly imagined and exquisitely rendered, Sideshow is Sheri S. Tepper's most controversial novel yet.

Beauty - in both name and appearance - is a twenty-year-old Bangladeshi, back in England having disgraced her family by fleeing an abusive arranged marriage. Forced onto the jobseeker’s treadmill and under extreme domestic pressure, she cracks and runs away. Her encounters with officialdom, fellow claimants, and strangers in the city streets, complicated by the restrictions and comfort of her language and culture, place her at the mercy of such unlikely helpers as Mark, a friendly, Staffordshire bull terrier-breeding exoffender, and Peter, a middle-class underachiever on the rebound from a bitter relationship. With determination and good humour, Beauty moves ever closer to making her choice between family duty and personal freedom. All the while, however, her brothers are searching for her across town. Can she make the choice herself, before she’s forced to? A sharply rendered, compassionate and challenging portrait of a fragmented, multicultural urban England.
