Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

A world of fun, excitement, exploration and satisfaction awaits the owner of an iconic BMW E30 3 Series cars - and this book is your ticket to that wonderful world. Some of the most popular forms of motorsport are examined, along with explanations of how to take part and what equipment you need.

"If BMW cars are the "ultimate driving machines," then BMW's M cars (and motorcycles) are the legendary manufacturer's ne plus ultra offerings. BMW M celebrates the 50th anniversary of this prestigious German enthusiast brand"--

Nationalism, ethnicity and citizenship lie at the heart of many of the societal changes that are currently transforming countries across the world. Global migration has undermined old certainties provided by the established framework of nation-states, with inward migration, cultural diversity and transnational affiliations having become established facts of life in many countries. These phenomena raise significant challenges for traditional conceptions of citizenship. This book provides a detailed examination, from a variety of disciplinary perspectives, of contemporary issues relating to nationalism, ethnicity and citizenship. The book aims to take stock of current understandings in this area, and to establish whether there are connections between the understandings that are being articulated within different social science disciplines. The contributors, who are all senior international figures in their respective fields, are drawn from a range of disciplines, including Politics, Sociology, Communication/Media, Geography, Psychology and Education. Collectively, they address the following specific questions: • To

what extent do multiculturalism and transnationalism undermine nationalism or, on the contrary, provoke its reassertion? • How do the multiple identities and multiple levels of belonging experienced today interact with traditional nationalist ideology? • Within multicultural societies, how far do representations of ' cultural others ' still play a role in nationalist constructions of ' the nation ' ? • How successfully have the welfare systems of nation-states responded to the influx of migrants? • How have national politicians responded to the cultural diversity of their own countries and have they moved beyond the traditional logic of nationalism within their thinking? • Why are extreme right-wing parties gaining increased levels of support? • What social and psychological resources do citizens require in order to function effectively at the political level within multicultural democratic societies? • How can the educational systems of states, which have traditionally been used for nationalist purposes, be harnessed to enhance the competences needed by their citizens for successful living in multicultural societies? • What changes need to be made to educational policies in order to ensure the effective integration of minority citizens? Despite the fact that they have been written from different disciplinary perspectives, the various chapters in this book paint a consistent picture. They offer a view of a world in which nationalism is still very much a dominant ideology which configures the discourse and thinking of citizens and politicians alike about nation-states, ethnic diversity, multiculturalism and citizenship. The crucial role of education is also highlighted, with school systems being uniquely positioned to equip citizens with the psychological resources and intercultural competences that are needed to function effectively within multicultural societies.
