The rapid progress of information technology allows for increasingly powerful software intensive embedded systems (machines) executing integrated applications connected by and to global networks. Thus these systems are more and more networked among each other, but also with data and services on the Internet. Intelligent solutions originate which gather processes of the living environment by means of sensors and actuators, connect them to virtual software worlds and interpret, monitor and control these processes in interaction with people. In this way, so-called Cyber-Physical Systems evolve – a living in a networked world. The interlocking applications include smart cities, social infrastructures with integrated telemedicine care, enhanced connected mobility with fully or semi-autonomous driving cars and traffic systems, safety, security and privacy as well as networked production and the sustainable energy turnaround. The integrated research agenda Cyber-Physical-Systems (agendaCPS) provides a comprehensive overview of the capabilities and benefits of the arising CPS-applications and manifold technological and social challenges involved. The agenda illustrates which value the subject for economy and society has: revolutionary applications of Cyber-Physical Systems address technological and social trends and needs; at the same time they penetrate and interconnect more and more areas of life. On the basis of concrete future scenarios essential application domains are shown. Their analysis reveals which capabilities and technologies form the basis of Cyber-Physical systems and which innovation and possible conflict potential is inherent. The agendaCPS makes clear which research and action areas are of particular importance. In these contexts opportunities, but also risks become apparent for Germany by Cyber-Physical Systems. This is the English translation of the report agenda Cyber-Physical Systems finished three years ago as a German acatech project by a German publication.

Catching the Bad Guy (Book Two of Janet Maple Romantic Suspense Series) Janet Maple and Dennis Walker make a good team: she is a top-notch white collar crime investigator, and so is he. Both Janet and Dennis are thrown in for a loop when Janet's treacherous snake of an ex-boyfriend, Alex Kingsley, is appointed as their new boss, and the case that was supposed to be the highlight of their careers is dismissed for lack of evidence. To make matters worse, Alex is asking Janet to get back together, and the one man she wishes would ask her out sees

her as nothing more than a coworker. Janet's love life soon becomes the least of her worries, as she begins to suspect that Alex's rekindled interest in her is driven by ulterior motives. She is determined to get to the bottom of things, but she can't do it alone. Together, Janet and Dennis team up to solve a tangled white collar crime web that leads to powerful politicians and corporate executives. Armed with their keen instincts and skills, Janet and Dennis are bound to succeed. There is just one glitch: both are attracted to each other, and both refuse to admit it. Will Janet and Dennis solve the biggest case of their careers or will their attraction to each other get in the way? *Catching the Bad Guy is book two of the Janet Maple Series, but it can easily be read on its own.*
