The Newbery Award-winning author of *Up a Road Slowly* presents the unforgettable story of Jethro Creighton—a brave boy who comes of age during the turbulent years of the Civil War. In 1861, America is on the cusp of war, and young Jethro Creighton is just nine-years-old. His brother, Tom, and his cousin, Eb, are both of fighting age. As Jethro's family is pulled into the conflict between the North and the South, loyalties are divided, dreams are threatened, and their bonds are put to the test in this heart-wrenching, coming of age story. "Drawing from family records and from stories told by her grandfather, the author has, in an uncommonly fine narrative, created living characters and vividly reconstructed a crucial period of history."—Booklist

The *Other Civil War* offers historian and activist Howard Zinn's view of the social and civil background of the American Civil War—a view that is rarely provided in standard historical texts. Drawn from his New York Times bestseller *A People's History of the United States*, this set of essays recounts the history of American labor, free and not free, in the years leading up to and during the Civil War. He offers an alternative yet necessary account of that terrible nation-defining epoch.

Paul Robinson's *Russian Conservatism* examines the history of Russian conservative thought from the beginning of the nineteenth century to the present. As he shows, conservatism has made an underappreciated contribution to Russian

national identity, to the ideology of Russian statehood, and to Russia's social-economic development. Robinson charts the contributions made by philosophers, politicians, and others during the Imperial, Soviet, and post-Soviet periods. Looking at cultural, political, and social-economic conservatism in Russia, he discusses ideas and issues of more than historical interest. Indeed, what Russian Conservatism demonstrates is that such ideas are helpful in interpreting Russia's present as well as its past and will be influential in shaping Russia's future, for better or for worse, in the years to come. For the past two centuries Russian conservatives have sought to adapt to the pressures of modernization and westernization and, more recently, globalization, while preserving national identity and political and social stability. Through Robinson's research we can now understand how Russian conservatives have continually proposed forms of cultural, political, and economic development seen as building on existing traditions, identity, forms of government, and economic and social life, rather than being imposed on the basis of abstract theory and foreign models.

Invisible Man is a milestone in American literature, a book that has continued to engage readers since its appearance in 1952. A first novel by an unknown writer, it remained on the bestseller list for sixteen weeks, won the National Book Award for fiction, and established Ralph Ellison as one of the key writers of the century. The nameless narrator of the novel describes growing up in a black community in the South, attending a Negro college from which he is expelled, moving to New York and becoming the chief spokesman of the Harlem branch of "the Brotherhood", and retreating amid violence and confusion to the basement lair of the Invisible Man he imagines himself to be. The book is a passionate and witty tour de force of style, strongly influenced by T.S. Eliot's *The Waste Land*, Joyce, and Dostoevsky.

The long decade from the October Revolution to 1930 was the beginning of a great experiment to create a socialist society. Throughout these years, socialist trade unions attempted to transform the Russian worker into a productive and enthusiastic participant in this new order. How did the workers themselves react to these efforts? To what extent were they and their culture transformed into the ideal forms proclaimed in the official ideology? In *Republic of Labor*, Diane P. Koenker illuminates the lived experience of Russia's printers, workers who differed from their comrades because of their skill and higher wages, but who shared the same challenges of economic hardship and dangerous conditions. Paying close attention to the links between work, politics, and the everyday, the author focuses on workers' efforts to define their place in socialist society. Gender issues are also emphasized, and here we see the persistence of a masculinist working-class culture counterposed to an official culture promoting gender equality. Through this engaging narrative, Koenker develops a highly original discourse about class in Soviet society that will interest all students of Russian history as well as those readers who wish to reinvigorate class as a historical and sociological tool of analysis.

Competition and the State analyzes the role of the state across a number of dimensions as it relates to competition law and policy across a number of dimensions. This book re-conceptualizes the interaction between competition law and government activities in light of the profound transformation of the conception of state action in recent years by looking to

the challenges of privatization, new public management, and public-private partnerships. It then asks whether there is a substantive legal framework that might be put in place to address competition issues as they relate to the role of the state. Various chapters also provide case studies of national experiences. The volume also examines one of the most highly controversial policy issues within the competition and regulatory sphere—the role of competition law and policy in the financial sector. This book, the third in the Global Competition Law and Economics series, provides a number of viewpoints of what competition law and policy mean both in theory and practice in a development context.

By analysing the experience of Finland, Risto Alapuro shows how upheavals in powerful countries shape the internal politics of smaller countries. This linkage, a highly topical subject in the twenty-first century world, is concretely studied by putting the abortive Finnish revolution of 1917-18 into a long historical and a broad comparative perspective.
