The first part focuses on relational databases and presents the notions of integrity constraints, data consistency, transactions and normalization, both in single-server and distributed

Acces PDF Database Systems Introduction To

environments. The second part will introduce the four families of NoSQL databases, with a special focus on document (MongoDB) and graph databases (Neo4j).

Introduction to Databases | Gianluca Quercini

Access PDF Database Systems Introduction To

What is a database? A database is an organized set of data stored electronically in a computer system. Databases required a software layer that serves as an interface between the data and the users. This layer is known as a database management system

Access PDF Database Systems Introduction To

or DBMS. There are many kinds of databases, but in general, you may label them as relational and non-relational databases.

Relational databases are by far the most common.
