An important feature of DB2 programs is the error processing. The error diagnostic containing the SQL Return Code is held in the field SQLCODE within the DB2 SLCA block. SQLCODE is no longer part of the SQL-standard. The SQL-standard replaced SQLCODE by the more detailed SQLSTATE.

~~DB2 SQL return codes~~ - Wikipedia

DB2 also follows this particular principle: DB2 is a product of IBM and most of the time it runs on IBM mainframes. we use this in assembly language that is AS400 Or runs in Linux environment. Note We can also download DB2 to the local PC and we can install it, but this tutorial primarily focuses on DB2 on IBM mainframes. x Dismiss alert
