Greatest Common Factor (GCF) and Least Common Multiple (LCM) word problems Grade 5 Math Word Problems Worksheet Read and answer each question. 1.

Greatest Common Factor (GCF) and Least Common Multiple ...

Word Problems Involving Greatest Common Factor And Least Common Multiple. Word Problems Involving Highest Common Factor and Lowest Common Multiple. Read each question carefully and think about what the question is asking. Find the prime factors for each number Draw a Prime factor diagram. Remember Numbers in the overlap = HCF Numbers in the whole diagram = LCM.

Word Problems Involving Greatest Common Factor And Least ...

And that least common multiple is equal to 120. Now there's other ways that you can find the least common multiple other than just looking at the multiples like this. You could look at it through prime factorization. 30 is 2 times 15, which is 3 times 5. So we could say that 30 is equal to 2 times 3 times 5.
