### Measurement Categories (CAT I, II, III, IV)

Measurement categories are defined by the CE and UL safety standard IEC 61010-1 and are used to indicate the ability of an instrument (like the WattNode ® meter) to withstand voltage spikes without posing a shock hazard to the operator. An instrument should only be

## What You Need to Know About Category Ratings | EC&M

Examples are measurements on circuits not derived from mains, and specially protected (internal) mains-derived circuits. In the latter case, transient stresses are variable; for that reason IEC 61010-1-5.4.1 (g) requires that the
