Contracts for the Sale of Goods delivers a detailed analysis and in-depth comparison of the substantive law for the sale of goods in domestic and international transactions. Practitioners, academics, and anyone involved in the sale or purchase of goods in the international market will need this thorough analysis of both the text of the United Nations Convention on Contracts for the International Sale of Goods (CISG) and the cases that have addressed and interpreted the CISG. Contracts for the Sale of Goods provides a complete discussion and comparison of the UNIDROIT Principles of International Commercial Contracts including the new provisions on setoff, assignment, and limitation periods, as well as a comparative treatment of the CISG and the UNIDROIT Principles to the articles of the Uniform Commercial Code. Both practitioners and academics will find the clarity and ease of access useful to the comparative legal analysis in this book. Of particular note is the style and format which allows the reader to find the relevant provisions and cross-references quickly and accurately. Contracts for the Sale of Goods provides you with all relevant materials in one source, with the text following the structure of the Convention for clarity and convenience Access the Incoterms 2000, the complete texts of Article Two and the PIC, and a list of parties to the CISG. Moreover, the text is structured to provide the answers first, then supplement this with the underlying purpose and rationale for the rules. This allows the reader the ability to locate the correct law quickly, but also allows the reader to delve further into the law if desired.

No one involved in international trade or environmental activism can afford to ignore this vital publication. The information it provides (on WTO jurisprudence, on current and pending environmental initiatives, on the science behind the disputes), no less than the fresh and convincing analysis it holds forth, make it an essential tool for understanding some of the most crucial issues in international law today.

International Trade provides a thorough understanding of the issues involved in developing and managing overseas trade. Originally aimed at those studying for professional qualifications and practitioners involved in export and international trade, combining 'textbook' information and accessible guidelines for best practice, this important handbook has now been fully updated with new material on EU and US law and on major target markets such as China. Opening with a description of the structure of the global economy and the dynamics governing world trade, this third edition covers a multitude of topics

Resource added for the Global Business program 101381.

This title was first published in 2001. This volume covers all aspects of export credit management as well as the management of overseas subsidiary companies' credit operations through a series of inter-linked chapters written by 25 experts in the international field. This third edition has been completely revised and, in substantial parts, re-written to reflect the development and availability of the modern tools now at the disposal of the international credit manager, especially in the area of information technology. New chapters have been added on bank risk and international bankruptcy law to respond to the growing interest in these areas. The objectives of the handbook are to provide a complete operating guide and training reference for the application of the financial and control techniques necessary for international credit management and to describe the tools available for all the processes from initial policy-making through to final collection of trade debts.
