Management information systems (MIS)
produce the information that managers
use to make important strategic decisions.
This book covers the essential managerial
skills that are necessary to design these
systems. In contrast to other books on
management information systems, this
book takes a decidedly managerial
perspective. It focuses on how managers
perceive and respond to information, and
on their need to use this information to
make important decisions. The book
considers how systems can be designed to
combat 'information overload'

Without Case Edition 8 1
experienced by managers, using such techniques as data aggregation and data visualization. Chapters provide an in-depth and practical consideration of these topics, focusing on the use of information systems for managerial decision making. Designing Management Information Systems covers the topics of key performance indicator monitoring, and of shortlisting and selecting alternatives from a range of options. These are managerial decisions for which MIS are particularly useful, and which managers face on a daily basis. This is the first book offering practical guidance on how systems should be designed to support these decisions. It is written for managers, those studying business, management, and IT, and those developing MIS on behalf of management.

Handbook of Management Information Systems is a clear, specific, rigorous, and

File Type PDF Information Systems For Managers
