This book deals with the various ways Netflix reconceptualises television as part of the process of TV IV. As television continues to undergo a myriad of significant changes, Netflix has proven itself to be the dominant force in this development, simultaneously driving a number of these changes and challenging television 's existing institutional structures. This comprehensive study explores the pre-history of Netflix, the role of binge-watching in its organisation and marketing, and Netflix 's position as a transnational broadcaster. It also examines different concepts of control and the role these play in the history of ancillary technologies, from the remote control to binge-watching as Netflix 's iteration of giving control to the viewers. By focusing on Netflix 's relationship with the linear television schedule, its negotiations of quality and marketing, as well as the way Netflix integrates into national media systems, Netflix and the Re-invention of Television illuminates the importance of Netflix 's role within the processes of TV IV.

What does the title mean? It is the idea that we can approach any electrical or electronic (and mechanical) fault using a basic logical or probability-based investigation to observe and correctly identify the significant indicators that will eventually lead us to the failure or failures. This is no different from the Detective Books you read or TV Shows you watch where the hero used a logical approach (while all those around him just ran around willy nilly) to identify the clues and catch the bad guy. This book is a complete course in Troubleshooting. Along with the written theory explaining my troubleshooting methods, there are over 80 diagrams and drawings, and 50 comprehension questions (with the answers) that will help you monitor how much you understand.
