Updating the driver usually fixes this problem, though a new graphics card might be in order. If the problem persists even when you're testing the monitor on another machine, there might be something wrong with the internal electronics. Try an alternative input (HDMI/DisplayPort/DVI) if possible. Random Shutoffs

How to Fix the Most Common Problems With LCD Monitors

Opening the LG monitor was simple and done in about 10-20 minutes, just requires patience and care and flat head and philips head screwdriver. Remember not to force any cables out, there is often a small clip holding half of the cable and it does still need a bit of force, the video I posted above is great at showing that.

Solutions to Common LG Phone Problems

Check the cable between the monitor and the computer to make sure that each end is physically secure. Completely unplug, and plug back in, each end just to be sure. Newer interfaces, like HDMI, often simply "push" in and "pull" out, meaning gravity can sometimes eventually work them loose from both the monitor side and the computer side.

How to Fix Discoloration on a Computer Screen

Solution 1: Change Display Settings. The most general cause of the black bars is your system's Display Settings. Sometimes, your display settings can change due to a Windows update, etc. which results in the black bars on the side of the monitor. Therefore, to fix it, you will have to change your display settings.
