In the summer of 1881, Lt. Adolphus Greely of the Fifth United States Cavalry and a crew of twenty-one men set out on the Proteus to explore the then relatively-unknown Arctic Circle. During their three-year

journey, the Lady Franklin Bay expedition, as it came to be known, was meant to ascertain new astronomical data, to establish an observation station, and to record other meteorological data. And while they did accomplish those tasks, the crew of the Proteus will instead forever be remembered for the catastrophe that they encountered, one that yielded few survivors. After a relatively calm first year in the Arctic, the members of the Lady Franklin Bay Expedition grew increasingly desperate as ships carrying essential supplies—food, clothing, and building materials, among other items—failed to reach them due to increasingly perilous conditions. Slowly but surely the harsh weather and low supplies decimated the crew, as one by one they succumbed to the merciless Arctic. When a rescue vessel finally reached the Proteus in 1884, only six members of the original expedition remained. Told in concise prose with stunning clarity, Proteus crew member David L. Brainard's *Outpost of the Lost* is an inspiring account of human spirit and perseverance, and is not to be missed by any armchair adventurer or history buff.

"Intriguing [and] enjoyable." –Ian McGuire, New York Times Book Review
Ice Ghosts weaves together the epic story of the lost Franklin Expedition of 1845—whose two ships, HMS Erebus and HMS Terror, and their crew of 129 were lost to the Arctic ice—with the modern tale of the scientists, divers, and local Inuit behind the recent incredible discoveries of the wrecks. Paul Watson, a Pulitzer Prize-winning journalist who was on the icebreaker that led one of the discovery expeditions, tells a fast-paced historical adventure story and reveals how a combination of faith in Inuit knowledge and the latest science yielded a discovery for the ages.
