A growing number of cybercriminals are shifting from conventional programming languages to "exotic" programming languages.

Hackers Turning to 'Exotic' Programming Languages for Malware Development

The researchers concluded that "Programs written using the same malicious techniques but in a new language are not usually detected at the same rate as those written in a more mature language." ...

Hackers Pivot To Exotic Programming Languages To Carry Out Devastating Malware Attacks

MosaicLoader is a heavily obfuscated downloader that can infect target devices with cryptominers, stealers, or backdoor malware.

MosaicLoader Malware Targets Users Looking For Pirated Software

An ongoing worldwide campaign is pushing new malware dubbed MosaicLoader camouflaged as cracked software via search engine advertising to infect wannabe software pirates' systems.

Online Library Malware Reverse Engineering

New MosaicLoader malware targets software pirates via online ads
MosaicLoader operators employed several tactics to obstruct their malware analysis efforts and increase their success rate.

MosaicLoader Malware Uses SEO Poisoning to Infect Software Pirates' Systems
Cybersecurity firm Bitdefender has discovered a new form of malware that gets installed through advertisements in search results. The company says the malw ...

Cybersecurity researchers discover Windows malware that gets installed via ads
Be careful what you search for online. Cybercriminals developed a new family of malware that goes after specific online searches.

Before your next Google search, beware of these spam ads distributing malware
"We named it MosaicLoader because of the intricate internal structure that aims to confuse malware analysts and prevent reverse-engineering," Bitdefender said in a blog post.
MosaicLoader does ...

Pirate gamers, beware: This malware targets you
"As attackers evolve and change their ways, we as malware analysts and security researchers need to stay abreast of that as well." Wardle will share what he learned from reverse-engineering and ...

Attackers Already Unleashing Malware for Apple macOS M1 Chip
Bitdefender researchers have identified a new family of malware while investigating processes that add local exclusions in Windows Defender for specific file names. We named it MosaicLoader because of ...

Debugging MosaicLoader, One Step at a Time
Researchers warn about a new malware that hides among Windows Defender's exclusions to evade detection by the antivirus program.

This New Malware Hides Itself Among Windows Defender Exclusions to Evade Detection
