How right-wing political entrepreneurs around the world use religious offense—both given and taken—to mobilize supporters and marginalize opponents. In the United States, elements of the religious right fuel fears of an existential Islamic threat, spreading anti-Muslim rhetoric into mainstream politics. In Indonesia, Muslim absolutists urge

suppression of churches and minority sects, fostering a climate of rising intolerance. In India, Narendra Modi's radical supporters instigate communal riots and academic censorship in pursuit of their Hindu nationalist vision. Outbreaks of religious intolerance are usually assumed to be visceral and spontaneous. But in *Hate Spin*, Cherian George shows that they often involve sophisticated campaigns manufactured by political opportunists to mobilize supporters and marginalize opponents. Right-wing networks orchestrate the giving of offense and the taking of offense as instruments of identity politics, exploiting democratic space to promote agendas that undermine democratic values. George calls

this strategy “hate spin” —a double-sided technique that combines hate speech (incitement through vilification) with manufactured offense-taking (the performing of righteous indignation). It is deployed in societies as diverse as Buddhist Myanmar and Orthodox Christian Russia. George looks at the world's three largest democracies, where intolerant groups within India's Hindu right, America's Christian right, and Indonesia's Muslim right are all accomplished users of hate spin. He also shows how the Internet and Google have opened up new opportunities for cross-border hate spin. George argues that governments must protect vulnerable communities by prohibiting calls to action that lead

They arm hate spin agents' offense-taking campaigns with legal ammunition. Anti-discrimination laws and a commitment to religious equality will protect communities more meaningfully than misguided attempts to insulate them from insult.

Self-determination, imported into the Middle East on the heels of World War I, held out the promise of democratic governance to the former territories of the Ottoman Empire. The new states that European Great Powers carved out of the multilingual, multiethnic, and multireligious empire were expected to adhere to new forms of affiliation that emphasized previously unimportant differences. In 1936, the new Republic of Turkey lay claim to Antioch and the Sanjak (province)

Turkey's ambassador made a passionate argument that Alexandretta was a homeland of the Turks, a place that was essentially Turkish. With France and Turkey unable to reach agreement, the League of Nations was called in to broker a compromise consistent with the spirit of the new democratic impulse, one of many disputes that it had to adjudicate as self-determination became a rallying cry for peoples who wanted to form new nations around their collective identities. Over the next four years, Turkey struggled for recognition of its claims to the territory, while Turkish authorities competed to win hearts and minds

Shields illuminates how the people of this region-about a quarter of a million Arabs, Armenians, Circassians, Kurds, and Turks-were forced to choose between Turkish and Arab identities. In the end, Shields shows, national identities played no role in the outcome of the dispute. What happened on the ground in this contested region was determined by Great Power diplomacy amidst the crisis of European democracy in the late 1930s, a story skillfully interwoven with the violent struggles that took place on the streets of the province. In the end, a new kind of identity politics was unleashed that redefined belonging, transformed

experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women

While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women ' s brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique
