challenges Performance results

MPTCP - Avoiding TIME-WAIT

Applications are able to avoid TIME-
WAIT (e.g., apache2,

apachebenchmark,...) On the data-
level this works. But not at the sub ow-
level ... Many sub ows are lingering
around in TIME-WAIT state although
the application tried to avoid it.

Mptcp Linux Kernel Implementation
Status - reliefwatch.com

To achieve this record, researchers from Université catholique de Louvain in Belgium have tuned their reference implementation of MPTCP in the Linux Kernel. All the software used to achieve this performance are open-source and publicly available. The Linux Kernel being used on these machines is based on the stable v0.86 release of Multipath TCP. This stable release has been tuned to improve its performance :

all of them together from a single notation.

[1812.03210] MPTCP Linux Kernel Congestion Controls

Unlike upstream Linux, MPTCP is disabled in the default Red Hat Enterprise Linux (RHEL) 8.3 runtime. To enable the possibility of creating sockets, system administrators need to issue a proper `sysctl` command: `# sysctl -w net.mptcp.enabled=1 # sysctl net.mptcp.enabled net.mptcp.enabled = 1` Preparing the system for its first MPTCP socket

Control January 2017 W Vegas has been implemented in the Linux Kernel and is part of UCLouvain's MPTCP implementation now . In [VEGAS], we study the traffic shifting ability of wVegas, reveal that it can guarantee the intra-protocol fairness and show the domino effect which is an indication of good performance.
