The end of the Cold War has changed the shape of organized violence in the world and the ways in which governments and others try to set its limits. Even the concept of international conflict is broadening to include ethnic conflicts and other kinds of violence within national borders that may affect international peace and security. What is not yet clear is whether or how these changes alter the way actors on the world scene should deal with conflict: Do the old methods still work? Are there new tools that could work better? How do old and new methods relate to each other? International Conflict Resolution After the Cold War critically examines evidence on the effectiveness of a dozen approaches to managing or resolving conflict in the world to develop insights for conflict resolution practitioners. It considers recent applications of familiar conflict management strategies, such as the use of threats of force, economic sanctions, and negotiation. It presents the first systematic assessments of the usefulness of some less familiar approaches to conflict resolution, including truth commissions, "engineered" electoral systems, autonomy arrangements, and regional organizations. It also opens up analysis of emerging issues, such as the dilemmas facing humanitarian organizations in complex emergencies. This book offers numerous practical insights and raises key questions for research on conflict resolution in a transforming world system.

When we are baffled by the insanity of the “other side”–in our politics, at work, or at home–it’s because we aren’t seeing how the conflict itself has taken over. That’s what “high conflict” does. It’s the invisible hand of our time. And it’s different from the useful friction of healthy conflict. That’s good conflict, and it’s a necessary force that pushes us to be better people. High conflict is what happens when discord distills into a good-versus-evil kind of feud, the kind with an us and a them. In this state, the brain behaves differently. We feel increasingly certain of our own superiority, and everything we do to try to end the conflict, usually makes it worse. Eventually, we can start to mimic the behavior of our adversaries, harming what we hold most dear. In this “compulsively readable” (Evan Osnos, National Book Award-winning author) book, New York Times bestselling author and award-winning journalist Amanda Ripley investigates how good people get captured by high conflict–and how they break free. Our journey begins in California, where a world-renowned conflict expert struggles to extract himself from a political feud. Then we meet a Chicago gang leader who dedicates his life to a vendetta–only to realize, years later, that the story he’d told himself about the conflict was not quite true. Next, we travel to Colombia, to find out whether thousands of people can be nudged out of high conflict at scale. Finally, we return to America to see what happens when a group of liberal Manhattan Jews and conservative Michigan corrections officers choose to stay in each other’s homes in order to understand one another better, even as they continue to disagree. All these people, in dramatically different situations, were drawn into high conflict by similar forces, including conflict entrepreneurs, humiliation, and false binaries. But ultimately, all of them found ways to transform high conflict into good conflict, the kind that made them better people. They rehumanized and recategorized their opponents, and they revived curiosity and wonder, even as they continued to fight for what they knew was right. People do escape high conflict. Individuals–even entire communities–can short-circuit the feedback loops of outrage and blame, if they want to. This is an “insightful and enthralling” (The New York Times Book Review) book–and a mind-opening new way to think about conflict that will transform how we move through the world.

America's Peacemakers: The Community Relations Service and Civil Rights tells the behind-the-scenes story of a small federal agency that made a big difference in civil rights conflicts over the last half century. In this second edition of Resolving Racial Conflict: The Community Relations Service and Civil Rights, 1964-1989, Grande Lum continues Bertram Levine’s excellent scholarship, expanding the narrative to consider the history of the Community Relations Service (CRS) of the U.S. Department of Justice over the course of the last three decades. That the Trump administration has sought to eliminate CRS gives this book increased urgency and relevance. Covered in this expanded edition are the post-9/11 efforts of the CRS to prevent violence and hate crimes against those perceived as Middle Eastern. Also discussed are the cross-border Elián González custody dispute and the notable tragedies of Trayvon Martin and Michael Brown, both of which brought police interaction with communities of color back into the spotlight. The 2009 Matthew Shepard and James Byrd, Jr., Hate Crimes Prevention Act substantially altered CRS’s jurisdiction, which began to focus on gender, gender identity, religion, sexual orientation, and disability in addition to race, color, and national origin. Lum’s documentation of this expanded jurisdiction provides insight into the progression of civil rights. The ongoing story of the Community Relations Service is a crucial component of the national narrative on civil rights and conflict resolution. This new edition will be highly

informative to all readers and useful to professionals and academics in the civil rights, dispute resolution, domestic and international peacemaking, and law enforcement-community relations fields.

Conflict Resolution in Asia: Mediation and Other Cultural Models is an exploration of human interaction, conflict, and conflict resolution in the incredibly diverse region that consists of South, East, and Southeast Asia. It examines how traditional, indigenous, and culturally based conflict resolution processes interact with more formal legal systems to build infrastructures that address conflicts at the interpersonal to international levels in ways that maintain social harmony. This book provides insight into situations where unique cultures come together to create a larger cultural identity, and how constructive and appropriate conflict resolution systems can work every day to establish positive relationships and overall peace in these complex communities. It demonstrates the importance of culture in addressing conflict and conflict resolution, and validates the significance of culturally appropriate processes in building and sustaining peace. From Southeast Asia, a survey of Indonesia, Laos, Philippines, Thailand, Singapore, and Vietnam highlights their rich cultures and conflict resolution processes. From East Asia, Mainland China and Hong Kong show the history of traditional models and the incorporation of mediation within a more formal legal system. Finally, a section on South Asia examines customary methods of dispute resolution working alongside a judiciary structure in India. These nine countries represent very different cultural groups with complex national histories, and varying degrees of influence from Western powers. Using select Asian nations as case studies of conflict resolution systems, this edited book examines the power of mediation and other cultural conflict resolution models as a tool for addressing conflicts and social justice.
