NFPA publishes more than 300 consensus codes and standards intended to minimize the possibility and effects of fire and other risks. NFPA codes and standards, administered by more than 250 Technical Committees comprising approximately 8,000 volunteers, are adopted and used throughout the world. Learn about the standards development process.

List of NFPA Codes and Standards

NFPA codes and standards both provide requirements for achieving outcomes. Handbooks take a deeper dive, providing the full text of a code or standard as well as expert commentary and features such as graphics, decision trees, testing procedures, case studies, sample forms and checklists, and other helpful aids to give a better understanding of the reasoning behind the requirements and how to apply them.

NFPA 915: Standard for Remote Inspections

NFPA 921 sets the bar for scientific-based investigation and analysis of fire and explosion incidents. Referenced in the field, in training, and in court, it is the foremost guide for rendering accurate opinions as to incident origin, cause, responsibility, and prevention. It is intended for use by both public sector employees who are responsible for fire investigation and private sector professionals who conduct investigations for insurance companies or litigation purposes.

NFPA 921: Guide for Fire and Explosion Investigations

Interconnected smoke alarms increase safety. In a Consumer Product Safety Commission (CPSC) survey of households with any fires, including fires in which the fire department was not called, interconnected smoke alarms were more likely to operate and alert occupants to a fire. 1 People may know about a fire without hearing a smoke alarm. When smoke alarms (interconnected or not) were on all ...

The Expert Source Just Got An Upgrade Learn more about NFPA LiNK™, your custom, on-demand code knowledge tool brought to you by NFPA. Currently, NFPA LiNK™ includes the four most recent versions of the National Electrical Code® (NEC®), NFPA 70E® (2021), and NFPA 101® (2021).

NFPA

NFPA has released NFPA 1700 Guide for Structural Fire Fighting, the first NFPA document connecting fire dynamics research to response strategy, tactics, and best practices for firefighters controlling fires within a structure. In 2014, NFPA received a new standards project request from a retired Kansas City fire chief asking for the development of a guide that filled the gap between the fire science community and the fire service.
