Tutorial - ns-3

ns-3 is distributed as source code, meaning that the target system needs to have a software development environment to build the libraries first, then build the user program. ns-3 could in principle be distributed as pre-built libraries for selected systems, and in the future it may be distributed that way, but at present, many users actually do their work by editing ns-3 itself, so having the source code around to rebuild the libraries is useful.

Getting Started - Tutorial - ns-3

This is an ns-3 tutorial. Primary documentation for the ns-3 project is available in four forms:

- ns-3 Doxygen/Manual: Documentation of the public APIs of the simulator
- Tutorial (this document)
- Reference Manual: Reference Manual
- ns-3 wiki This document is written in GNU Texinfo and is to be maintained in revision control on the ns-3 code server. Both PDF and HTML versions should ...

Building ns-3 The code for the framework and the default models provided by ns-3 is built as a set of libraries. User simulations are expected to be written as simple programs that make use of these ns-3 libraries. To build the set of default libraries and the example programs included in this package, you need to use the tool 'waf'.
