Based on the anoxic/oxic (A/O) step feed process, a modified University of Cape Town (UCT) step feed process was developed by adding an anaerobic zone and adjusting sludge return pipeline. Performance evaluation of these two types of processes was investigated by optimizing operational parameters, such as the anaerobic/anoxic/oxic volumes, internal recycle ratios, and sludge retention times ...

Careful consideration of the practical and ethical considerations involved in carrying out a piece of educational research needs to take place at the outset. Although this is something of an iterative process and some practical issues may not emerge or pose a potential challenge until after the research process has started, time spent attending to the practical aspects early on will help minimise complications and will contribute to the identification of an appropriate research question.
