5 Common Mistakes to Avoid when Writing a Discussion. By ScienceDocs Editor Dr. Horvath. Introduction: When editing a manuscript, the section that is typically the most problematic is the discussion. The purpose of the discussion is to review the study findings in light of the published literature and draw conclusions from the data.

Chapter 5 Discussion of findings 106 PhD Degree in Tourism Management – Leslie, D (2008) from which data was gathered is small, the researcher is of the opinion that the results still provide meaningful findings and insights that could be generalised to normal practice as carried out by the average hotel in the industry.

CHAPTER 5: DISCUSSION OF FINDINGS

Some might argue a conclusion is one of the most important components of any research paper or article. It's your last opportunity to make a good impression on your reader. If you can confidently say you've fully answered the question posed, or are leaving the readers with a thought-provoking consideration, you've done well.

Conclusion Examples

If you do not know how to cite a discussion board in APA, let us assist. When citing a discussion board in your reference list, do not forget to mention the author, the date of publication, the discussion thread, and, of course, the course URL. For instance: Prescott, J. (1999, March 28). Re: Diversity [Online discussion group]. Retrieved from

This book describes a novel approach to the theory of sampling from finite populations. The new unifying approach is based on the sampling autocorrelation coefficient. Step by step, the author derives a general set of sampling equations that describe the estimators, their variances as well as the corresponding variance estimators. These equations are applicable for a whole family of different sampling designs, varying from simple surveys to complex surveys based on multistage sampling without replacement and unequal probabilities. This volume will be useful for survey practitioners faced with complex surveys. The book also considers constrained estimation problems that may occur in practice when linear or nonlinear economic restrictions are imposed on the population parameters to be estimated and the observations stem from different surveys. For example, regression estimators and consistent estimation of contingency tables are special cases within this rather broad class of constrained estimators. This volume also offers a guide to little-known connections between design-based survey sampling and other areas of statistics and related disciplines. The common underlying principles in the distinct fields are explained by an extensive use of the geometry of the ancient Pythagorean theorem. Apart from its applied importance, the book may also serve as a textbook in advanced courses and as a reference for researchers in statistics and empirical economics. In order to make the text as self-contained as possible, the treatise includes one chapter with the main results from statistics, including regression analysis. Some familiarity with calculus and matrix algebra is a sufficient prerequisite. Paul Knottnerus received his PhD in economics in 1989 from the University of Amsterdam. In 1995 he joined Statistics

Netherlands, Department of Methods and Informatics. Previously he spent several years with Dutch Telecom. He is author of the book *Linear Models with Correlated Disturbances* (1991).

The *Sociology Writer's Guide* is designed to help sociology students at any level complete their writing assignments, and strengthen their research and bibliographic skills. Covers every kind of writing assignment a sociology student is likely to encounter: term papers, research papers, essays, compare/contrast papers, quantitative and qualitative research articles, text analysis papers, book reviews, abstracts, and essay exams. Teaches a practical, step-by-step approach to writing, from selecting a topic to submitting finished work. Uses Tips, Notes, and Reminders to highlight key points. Includes a complete list of examples for handling quotes and paraphrases, and for using citations and references in current sociological documentation style. Features a full discussion of bias-free language that covers race/ethnicity, social class, age, disability, religion, family status, and sexual orientation. The author is a sociology instructor, writer, and editor who has taught a writing for sociology class for over 12 years.
