Concentration tendencies, globalization, increasing cost pressure and well-informed customers all make up the hard competition faced by today's businesses. The "right" products, a successful market image, a strong positioning between suppliers and customers, efficient logistics and optimum organization structures contribute to a company's survival. Achieving this goal requires flexible information and communication systems that are fully adaptable to the specific situation. Modern retail information systems are not bound by organization borders but support both business partner cooperation and electronic commerce. This book presents the architecture of retail information systems, as well as the functions of SAP Retail, and in so doing links modern retail management with the implementation strategies based on innovative software systems.

Dive into this best-selling guide on SAP Material Master! Walk through basic concepts on how to tailor the SAP Material Master to your production environment, as well as learn detailed information on material master settings and their impact. This book provides the opportunity for readers to better understand their unique environment and how to make the SAP Material Master work for them. Veteran SAP Materials Management (MM) expert Matthew Johnson provides best practices for how to approach common scenarios, and offers cost-saving tips. Find out why planning is the most important (and often overlooked) aspect of understanding the SAP Material Master. Review how material master settings impact FI/CO and other SAP modules. This second edition incorporates feedback from first-edition readers and solution updates, along with a new section on subcontracting. By using practical examples, tips, and screenshots, the author brings readers up to speed on best practices for optimizing use of the SAP Material Master. - Fundamental SAP Material Master concepts - How settings impact other modules in SAP - Cost-effective procurement and planning techniques - Inventory and quality management best practices

This study guide was written for those seeking to become California Certified Nursery Professionals (CCN Pros). Developed through a partnership between the University of California Cooperative Extension (UCCE) and the California Association of Nurseries and Garden Centers (CANGC), this practical, easy-to-use manual covers important topics on basic horticulture, soil, fertilizer, and water management, plant problem diagnosis, integrated pest management, landscape design, and nursery sales. It also contains an appendix summarizing nursery laws and regulations, a glossary and an index. From indoor plants to lawns – this is a valuable reference for any career professional in the garden retail trade. As the primary information source for home gardeners, well-trained staff knowledgeable in basic horticulture is important to retailers wanting to better meet their customer's needs.

In the 1950s, a method called Material Requirements Planning (or "MRP") changed the world of manufacturing forever. But times have changed--customer tolerance times are shorter, product variety and complexity has increased, and supply chains have spread around the world. MRP is dramatically failing in this "New Normal." Demand Driven Material Requirements Planning (DDMRP), Version 2 presents a practical, proven, and emerging method for supply chain planning and execution that effectively brings the 1950s concept into the modern era. The foundation of DDMRP is based upon the connection between the creation, protection, and acceleration of the flow of relevant materials and information to drive returns on asset performance in the New Normal. Using an innovative multi-echelon "Position, Protect and Pull" approach, DDMRP helps plan and manage inventories and materials in today's more complex supply scenarios, with attention being paid to ownership, the market, engineering, sales, and the supply base. It enables a company to decouple forecast error from supply order generation and build in line to actual market requirements, and promotes better and quicker decisions and actions at the planning and execution level. DDMRP is already in use by MAJOR Global 1000 companies. This book is THE definitive work on DDMRP, and will be required as courseware for all those taking the Certified Demand Driven Planner (CDDP) Program. New Features in Version 2 Completely new Chapter 13, introducing the Demand Driven Adaptive Enterprise (DDAE) Model New Appendix E: The Innovations of DDMRP New and revised graphics scattered throughout the book
