Covers receipts and expenditures of appropriations and other funds.

The Hood Health Handbook is a comprehensive source of information and insight on nearly every health issue faced by the urban community. In plain language, the authors draw on well-known examples from urban culture to illustrate what works...and what doesn't. Focusing on natural and affordable approaches, the authors provide recommendations that anyone can put to practice. Volume One focuses on the status of health in the urban community, the "wrong foods" that make us unhealthy, the history of diet and healthcare among Black and brown people (focusing on how things changed for the worst), the diseases and illnesses that plague our communities, and holistic (natural) methods to heal and treat ourselves into wellness.

developments. It covers the main topics associated with mobile computing and wireless networking at a level that enables the students to develop a fundamental understanding of the technical issues involved in this new and fast emerging discipline. This book first examines the basics of wireless technologies and computer communications that form the essential infrastructure required for building knowledge in the area of mobile computations involving the study of invocation mechanisms at the client end, the underlying wireless communication, and the corresponding server-side technologies. It includes coverage of development of mobile cellular systems, protocol design for mobile networks, special issues involved in the mobility management of cellular system users, realization and applications of mobile ad hoc networks (MANETs), design and operation of sensor networks, special constraints and requirements of mobile operating systems, and development of mobile computing applications. Finally, an example application of the mobile computing infrastructure to M-commerce is described in the concluding chapter of the book. The book is suitable for a one-semester course in mobile computing for the undergraduate students of Computer Science and Engineering, Information Technology, Electronics and Communication Engineering, Master of Computer Applications (MCA), and the undergraduate and postgraduate science courses in computer science
