On the road the 300 has plenty of power and is good for 87mph, so is more than capable of covering some serious distance in total comfort. Like the 125, the 300 Joymax handles well too, the suspension is plush, well damped and keeps the scooter planted. The brakes were stonking on this model too; once again they're linked.

GTS 125 / 250 / 300 EVO: With the great success of GTS 250, SYM decide to develop a higher standard version. The major improvement is to tune up GTS 250 to GTS 300. Moreover, we changed its appearance from single head light to twin head light. That is not only for powerful looks but also provides better vision in the dark.

~~SYM GTS Joymax 300i - Motorcycle Specifications~~

The Sym GTS 250 is a fantastic machine for a 250cc, once owned a X9500 and this bike beats it hands down for comfort and handling. only gripe i have is the oil sign that lights up every 1000km telling you to change the oil,..1000km! too soon surely! and there is no tool to adjust the rear shocks, very bad thing for sym to be doing for a new bike.
