Exiled to the United States after her father, a Middle Eastern dictator, is killed in a coup, fifteen-year-old Laila must cope with a completely new way of life, the truth of her father's regime, and her mother and brother's ways of adjusting.

THERE: In an unnamed Middle Eastern country, fifteen-year-old Laila has always lived like royalty. Her father is a dictator of sorts, though she knows him as King—just as his father was, and just as her little brother Bastien will be one day. Then everything changes: Laila's father is killed in a coup. HERE: As war surges, Laila flees to a life of exile in the suburbs of Washington, D.C. Overnight she becomes a nobody. Even as she adjusts to a new school and new friends, she is haunted by the past. Was her father really a dictator like the American newspapers say? What was the cost of her family's privilege? Far from feeling guilty, her mother is determined to regain their position of power. So she's engineering a power play—conspiring with CIA operatives and rebel factions to gain a foothold to the throne. Laila can't bear to stand still as yet another international crisis takes shape around her. But how can one girl stop a conflict that spans generations?

Exiled to the American suburbs when her father, a Middle Eastern royal, is killed in a coup, 15-year-old Laila gradually adjusts to a different culture and considers new opportunities while her mother conspires with CIA operatives and rebel factions to regain the family throne.

Going Bovine meets Trainspotting in this gritty portrait of at-risk teens gaming the prescription drug trial system. Meet Audie: Professional lab rat. Guinea pig. Serial human test subject. For Audie and her friends, “volunteering” for pharmaceutical drug trials means a quick fix and easy cash. Sure, there’s the occasional nasty side effect, but Audie’s got things under control. If Monday’s pill causes a rash, Tuesday’s ointment usually clears it right up. Wednesday’s injection soothes the sting from Tuesday’s “cure,” and Thursday’s procedure makes her forget all about Wednesday’s headache. By the time Friday rolls around, there’s plenty of cash in hand and perhaps even a slot in a government-funded psilocybin study, because WEEKEND! But the best fix of all is her boyfriend, Dylan, whose terminal illness just makes them even more compatible. He’s turning eighteen soon, so Audie is saving up to make it an unforgettable birthday. That means more drug trials than ever before, but Dylan is worth it. No pain, no gain, Audie tells herself as the pills wear away at her body and mind. No pain, no gain, she repeats as her grip on reality starts to slide. . . . Raw and irreverent, Placebo Junkies will captivate readers until the very end, when author J. C. Carleson leans in for a final twist of the knife.

Star CIA officer Dara McIntyre has just endured a humiliating demotion. Punished for her affair with a Jordanian spy, she is stuck in a dreary desk job at CIA headquarters when orders come down for her to assess whether recently widowed officer Caitlin Wolff is still fit to serve in the field. Dara soon discovers that Caitlin and her late husband were running a lurid shadow operation. Convinced that the couple's unsanctioned acts led to the husband's death, Dara sets out to find the killers and salvage her career. But when her investigation takes a jarring turn, she can no longer be sure whom -- if anyone -- she can trust.

“The book you are holding will fundamentally change the way you look at the collection, compartmentalization, analysis, distribution, application, and protection of intelligence in your business. J. C. Carleson’s presentation of years of spy tradecraft will make you a more effective force within your organization.” —James Childers, CEO, ASG Global, Inc. When J. C. Carleson left the corporate world to join the CIA, she expected an adventure, and she found it. Her assignments included work in Iraq as part of a weapons of mass destruction search team, travels throughout Afghanistan, and clandestine encounters with foreign agents around the globe. What she didn’t expect was that the skills she acquired from the CIA would be directly applicable to the private sector. It turns out that corporate America can learn a lot from spies—not only how to respond to crises but also how to achieve operational excellence. Carleson found that the CIA gave her an increased understanding of human nature, new techniques for eliciting information, and improved awareness of potential security problems, adding up to a powerful edge in business. Using real examples from her experiences, Carle-son explains how working like a spy can teach you the principles of: Targeting—figuring out who you need to know and how to get to them Elicitation—a subtle way to get the answers you need without even asking a question Counterintelligence—how to determine if your organization is unwittingly leaking information Screening—CIA recruiters’ methods for finding and hiring the right people The methods developed by the CIA are all about getting what you want from other people. In a business context, these techniques apply to seeking a new job, a promotion, a big sale, an advantageous regulatory ruling, and countless other situations. As Carleson writes, “In a world where information has a price, it pays to be vigilant.” Her book will show you how.

In the heart of the American Revolution, General George Washington must take drastic measures to ensure his freshly-forged nation’s independence. In the summer of 1778, he establishes an underground espionage circle whose sole purpose is to uncover vital information from behind enemy lines—a circle known only as The Culper Ring. The members who make up the Ring are some of New York’s finest loyalist gentlemen, associating under the guise of elaborate code names. However, in August of 1779, a new manner of member is initiated. Her name is Julia Woodhull—known only as Agent 355 to her compatriots. In mere months, she becomes instrumental to the Ring’s reap of rival information, but her greatest mission is yet to come. Under Washington’s orders, Julia must infiltrate the fortified military base of West Point and obtain concrete evidence to incriminate General Benedict Arnold as a conspirator, double agent, and traitor to the United States of America...

In 1954, two college students were hiking along a creek outside of Boulder, Colorado, when they stumbled upon the body of a murdered young woman. Who was this woman? What had happened to her? The initial investigation turned up nothing, and the girl was buried in a local cemetery with a gravestone that read, "Jane Doe, April 1954, Age About 20 Years." Decades later, historian Silvia Pettem formed a partnership with law enforcement and forensic experts and set in motion the events that led to Jane Doe's exhumation and eventual identification, as well as the identity of her probable killer. The new Kindle version includes an Epilogue—with updated information on how the mystery finally was solved.

THE NUMBER ONE BESTSELLER. Detective Darnell died before he closed the case. Can his daughter solve it thirty years later? It was the murder that shocked the nation. Kate Rokesmith, a young mother, went to the river with her three-year-old son. She never came home. For three decades the case file has lain, unsolved, in the corner of an attic. Until the detective's daughter Stella, a cleaner who loves restoring order, starts to clear out her father's house after his death... THE DETECTIVE'S DAUGHTER SERIES: The Detective's Daughter. Ghost Girl. The Detective's Secret. The House With No Rooms. The Dog Walker.

For more than a decade, Katherine Zoepf has lived in or travelled throughout the Arab world, reporting on the lives of women, whose role in the region has never been more in flux. Today, Arab women outnumber men in universities, and a few are beginning to face down religious and social tradition in order to live independently, to delay marriage and to pursue professional goals. Deeply informed, heartfelt and urgent, Excellent Daughters brings us a new understanding of changing Arab societies and gives voice to the remarkable women at the forefront of this change.
