Inland saline waters are threatened worldwide by diversion and pollution of their inflows, introductions of exotic species and economic development of these ecologically valuable habitats. Since 1979 a series of international symposia on inland saline waters has served to strengthen and expand the scope of limnological research on inland saline waters. The seventh conference continued this tradition and the papers derived from the conference focused on the ecology of microbial communities, the influence of habitat geochemistry on biogeography of flora and fauna, physical and geochemical processes, and the conservation of inland saline waters. Of particular note are papers on Walker Lake, Nevada (USA), and the Salton Sea and Mono Lake, California (USA). Continued local, national and international efforts are required to inform the public and decision-makers about the environmental problems faced by saline waters. The papers in this volume will serve this end and should be of interest to aquatic ecologists, limnologists, aquaculturalists, and water resource managers.

DIVYour one-stop manual for every aspect of DIY motorcycle electrical repair and modification./divDIV/divDIVWeãve all stood at the front desk of a repair shop at some point, staring at an invoice, gritting our teeth and nursing our injured wallets. All vehicles will inevitably need maintenanceãand we pay a premium in labor fees every time we take them inãbut unlike an automobile, which has its electrical components hermetically sealed within its bodywork, the electrical components on a motorcycle are on display for all the world to see. Out in the open, they are constantly subjected to destructive elements like rain, sand, salt, dust, and ultraviolet rays . . . virtually everyone who owns a motorcycle will eventually have to deal with electrical problems. In How to Troubleshoot, Repair, and Modify Motorcycle Electrical Systems, motorcycle expert Tracy Martin provides crystal-clear, fully illustrated, step-by-step instructions for every electrical repair imaginable on a bikeãfrom the nuts-and-bolts basics to fuel-injection systems, onboard computers, repair and installation of factory and aftermarket accessories, and everything else in between. Complete with 600 full-color, how-to photos and 20 helpful diagrams, How to Troubleshoot, Repair, and Modify Motorcycle Electrical Systems will keep your bike on the road and your wallet in your pocket./div

This detailed book provides technical approaches to tackle a variety of questions related to intracellular lipid transport in order to improve our understanding at different scales of how lipids are accurately displaced between organelles, across long distances or at membrane contact sites, or within cellular membranes. The volume begins with methodologies to measure the movement of varied lipid species between or in organelle membranes, inside eukaryotic cells, including plant cells, or in bacteria, and continues in vitro or in silico approaches aiming to define, more from a biochemical and structural standpoints, how lipid transfer proteins (LTPs) or flippases/scramblases precisely function. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, Intracellular Lipid Transport: Methods and Protocols serves as an ideal guide for researchers seeking to shed light on diverse aspects of this critical and often elusive cellular process.

The leading introduction to computer crime and forensicsis now fully updated to reflect today's newest attacks, laws, and investigatory best practices. Packed with new case studies, examples, and statistics, Computer Forensics and Cyber Crime, Third Edition adds up-to-the-minute coverage of smartphones, cloud computing, GPS, Mac OS X, Linux, Stuxnet, cyberbullying, cyberterrorism, search and seizure, online gambling, and much more. Covers all forms of modern and traditional computer crime, defines all relevant terms, and explains all technical and legal concepts in plain English, so students can succeed even if they have no technical, legal, or investigatory background.

"How can we increase the production and harvest of living marine resources in the new millennium? Bridging potentials and environmental constraints". This was the theme of the 1st Maricult Conference arranged in Trondheim, Norway in June 2000 in connection with termination of the Norwegian research programme Maricult (1996-2000; www.maricult.org). The intention for the conference was not only to present a state of the art overview of the research conducted as part of the programme, but also to describe other experiences and to discuss the ideas and the scientific status of the programme with the international scientific community. A total of 50 oral communications and 8 posters were presented at the conference. Sixteen of them are included in the present volume. They deal with such topics as strategies for improving marine harvest, underlying mechanisms for marine productivity, new concepts of mariculture with emphasize on mussels, and nutrient supply and environmental impact.

As naturally occurring and abundant sources of non-fossil carbon, lignin and lignans offer exciting possibilities as a source of commercially valuable products, moving away from petrochemical-based feedstocks in favour of renewable raw materials. Lignin can be used directly in fields such as agriculture, livestock, soil rehabilitation, bioremediation and the polymer industry, or it can be chemically modified for the fabrication of specialty and high-value chemicals such as resins, adhesives, fuels and greases. Lignin and Lignans as Renewable Raw Materials presents a multidisciplinary overview of the state-of-the-art and future prospects of lignin and lignans. The book discusses the origin, structure, function and applications of both types of compounds, describing the main resources and values of these products as carbon raw materials. Topics covered include: Structure and physicochemical properties Lignin detection methods Biosynthesis of lignin Isolation methods Characterization and modification of lignins Applications of modified and unmodified lignins Lignans: structure, chemical and biological properties Future perspectives This book is a comprehensive resource for researchers, scientists and engineers in academia and industry working on new possibilities for the application of renewable raw materials. For more information on the Wiley Series in Renewable Resources, visit www.wiley.com/go/rrs

'With Hammer's book as a guide, major gaps in our understanding of saline lakes become clear and research opportunities become apparent.' Ecology, 68 (1987)
